#### ***"2f: Noise***

*All venues should ensure that steps are taken to avoid people needing to unduly raise their voices to each other. This includes – but is not limited to – refraining from playing music or broadcasts that may encourage shouting, including if played at a volume that makes normal conversation difficult. This is because of the potential for increased risk of transmission – particularly from aerosol and droplet transmission.*

*We will develop further guidance, based on scientific evidence, to enable these activities as soon as possible. You should take similar steps to prevent other close contact activities – such as communal dancing.”*
